

# Physical education and sport through the centuries

## Guidelines for the Authors

Journal “Physical education and sport through the centuries“ published by the Section for the history of physical education and sport of FIEP, is a scientific journal for the history, philosophy, theory and methodology of physical education and sport. It is issued **twice** a year and publishes original scientific papers, reviewed scientific papers, scientific gathering presentations, short scientific articles and professional articles, editorials and book reviews.

### *General remarks on papers*

All manuscripts are submitted to the journal’s editors, who, after reading the manuscripts, decide about the further procedure: (1) the manuscript is immediately sent for review; (2) if there are any objections and suggestions, the manuscript is sent back to the author for corrections; (3) rejection of the manuscript. The editor may decline the manuscript in the following cases: (1) the topic of the manuscript is not relevant; (2) a manuscript with a similar topic has already been published in the journal; (3) the manuscript does not conform to the standards of the journal. If the manuscript is not accepted, a short notice is sent to the author, but the manuscript is not sent back.

If the author has corrected the text in accordance with the instructions from the editor, the manuscript is sent for review. In that case, the author will be given a form called *Copyrights Declaration*, which needs to be filled in and sent back to the editor. The signature of the author verifies the authenticity of the text, authorship and acceptance of the review procedure.

All articles must be reviewed. There will be two reviewers from the relevant scientific area for each article, and both reviews will be anonymous. The author's name will be unknown to the reviewers (double blind review). If a reviewer finds the article noncompliant with the criteria of the journal, the editorial will not accept the article. If, on the other hand, the reviewers find the article acceptable, it will be put in one of the following categories: *Original scientific paper*, *Scientific work review*, *Short scientific article*, *Scientific gathering presentation*, *Professional article*, *Informative contribution*, and *Review*.

After reviews have been done, the editorial board will analyze them. If needed, the paper is sent back to the author who must comply with the suggestions and objections made by the reviewers. Once they have redone the paper, the authors need to specifically describe, on a *separate sheet of paper*, how they have resolved the reviewer’s suggestions.

**Only those papers that have been placed in one of the categories and which have two positive reviews will be published.**

### *Text style and organization*

Scientific articles must adhere to the IMRAD scheme (Introduction, Methods, Results and Discussion). If the manuscript is about theoretical research then the Methods is changed into Theoretical Basis.

### *Title*

The title page of the manuscript should contain the following information: (1) a concise, but informative title. Use of abbreviations is not encouraged; (2) the author's names (do not include degrees); the last one is introduced by "&"; (3) the affiliation of the authors, town and state; (4) the name and address of the corresponding author (must include title, degree and position of the corresponding author, phone and fax numbers – zip code for the country and city, and email address).

## Summary

The summary should be brief and Self-explanatory. It should cover a general presentation of the topic (the purpose and the objective of the paper), results and conclusions. The abstract should include up to 250 words and is placed after the title of the paper and Authors names. apart from summaries in Serbian the paper has to have a summary in English and other world languages.

## Key words

Key words are written after the summary in all stated languages. The Key words need to reflect the contents of the paper. Three to seven words, which are not part of the title, need to be singled out.

After key words there follows body of the text with the set parts in this order: *Introduction* This part of the paper ought to inform the reader of the issues dealt with in the research and the results of previous analyses The purpose of the research should also be clearly stated in this part, Theoretical basis, *Results and Discussion*.

## Tables, graphs and pictures

Each table and any illustration (black and white only) must be submitted on a separate sheet of paper. Tables should be numbered in the order in which they occur in the text and referred to as, for example, "Table 1". Each table should be accompanied by a short title. Tables should be accompanied with interpretations (legends). Font size is 10pt.

Illustrations, graphs and pictures shall be marked as "Figure 1". Photographs are sent in electronic form in a resolution not smaller than 300 dpi and in a .tif (figures) and .eps (graphics) format. Each figure needs to have a short title. In case that the figures are taken over from another paper, the title should not include the original name. In such a case, the source where the picture was taken from should be indicated under the picture.

If tables, graphs and pictures contain special symbols, or are prepared in a special program, they must be submitted in a separate file, with clearly indicated order of their inclusion in the text.

## Article technical form

Articles are written and published in Serbian and English language. For papers in Serbian a Serbian Cyrillic is used. If author's native language is not Serbian, their papers will be translated by editorial board.

Texts are to be written in Microsoft Word Windows program, on A4 paper format. Text is to be written in the Times New Roman font, size 12 pt in 1.5 spacing, aligned on both sides, with a 1 tub denting of the first row of a paragraph, with 2.5 cm paper margins. If it is necessary to indicate a word or a sentence in the text, use the italic. Text size should conform to 15 pages. ( no longer than 5000 words, including literaturu, tables and footnotes).

Articles and abstracts should be written in the third person, neutrally, adhering to a good style and defined linguistic norms.
